Malcolm Sawyer, Kathy O'Donnel : A Future for Public Ownership before purchasing it in order to gage whether or not it would be worth my time, and all praised A Future for Public Ownership:

Based on specially commissioned research, this text focuses on the 4 key utilities of rail, water, gas and electricity. It looks at possible different forms of public ownership of these utilities and argues that the advantages of privatization have been overstated; it also argues a case for the feasibility of taking back into public ownership at least some parts of the utilities.
