Scott Barclay : An Appealing Act: Why People Appeal in Civil Cases before purchasing it in order to gauge whether or not it would be worth my time, and all praised An Appealing Act: Why People Appeal in Civil Cases:

What makes people sue? Why do individuals who have lost their cases decide to appeal? In this book, the author offers a comprehensive description of the motives and concerns underlying an individual's decision to appeal in civil litigation. Contrary to most previous research on this topic that argues that people are primarily results-driven, Barclay

asserts that people are actually concerned with getting a fair hearing from the court - winning is secondary. The evidence he presents is meticulous but engaging, providing a perspective that explains many behaviours toward the courts, including noncompliance, violence and decisions to self-represent. This book is for anyone interested in the United States judicial system.
