antitrust that makes a student or lawyer, experienced and unexperienced, to understand the nature of antitrust law and the political and philosophical dilemmas to which it still remains bound to. This is not a casebook nor a hornbook, it is a simple book that describes the reason why antitrust analysis will remain within the same bounds no matter the time or country in which we study or practice it.

Examines dilemmas surrounding antitrust law and public and private power and the ways in which these problems have been addressed by legislatures and courts in the US and in Europe. Offers sometimes controversial observations on the history and doctrines of antitrust law, and conclusions as to how successfully the dilemma is being managed by the economies of the US and Europe. Amato is head of the Italian Antitrust Authority, a professor of law at the European University Institute in Florence, Italy, and a former Prime Minister of Italy.

The text of this important book is lucid and the interesting analysis - political, economic and legal - is clearly stated. The citations of legal and economic literature are well chosen. Professor Amato's perceptive thoughts on the differences between US and EC competition law and their philosophical development are warmly welcomed. Valentine Korah *European Competition Law* September 2002 ... this book is in my view essential reading for anybody interested in antitrust practice and policy Damien J. Neven *Journal of World Trade Law* September 2002 The book is well written and develops a number of challenging ideas in an accessible way...Its major strength is in the depth of the research and the copious references...As a concise history of antitrust laws, the book is indispensable. The ideas which it develops are challenging and serve as a valuable balance to the mass of economic analysis which purports to explain antitrust. Angus MacCulloch *The Modern Law Vol 62*, 1999 About the Author Giuliano Amato is Head of the Italian Antitrust Authority, Professor of Law at the European University Institute in Florence and a former Prime Minister of Italy.
