Michael Shapiro, Roy Spece, Rebecca Dresser, Ellen Clayton : Bioethics Law: Cases and Materials (American Casebook Series) before purchasing it in order to gauge whether or not it would be worth my time, and all praised Bioethics Law: Cases and Materials (American Casebook Series):

Introduces students to a wide range of law-related activities with selected materials that are instructive for lawyers, judges, and legislators (and other counselors, adjudicators, and rulemakers). Part I is a brief conceptual analysis of the nature of the New Biology and of theories for evaluating its importance, its continued development, and its applications. A discussion of "technology assessment" is included as part of this review. Includes analyses of what

would count as reasons for various uses of technology, e.g., therapeutic justifications for use of behavior control technologies.
