**From Ingramcontent : Criminalising Contagion: Legal and Ethical Challenges of Disease Transmission and the Criminal Law (Cambridge Bioethics and Law)** before purchasing it in order to gage whether or not it would be worth my time, and all praised Criminalising Contagion: Legal and Ethical Challenges of Disease Transmission and the Criminal Law (Cambridge Bioethics and Law):

The use of the criminal law to punish those who transmit disease is a topical and controversial issue. To date, the law (and the related academic literature) has largely focused on HIV transmission. With contributions from leading practitioners and international scholars from a variety of disciplines, this volume explores the broader question of if and when it is appropriate to criminalise the transmission of contagion. The scope and application of the laws in jurisdictions such as Canada, the United Kingdom and Norway are considered, historical comparisons are examined, and options for the further development of the law are proposed.

About the Author Catherine Stanton is a Lecturer in Law at the University of Manchester. Hannah Quirk is Senior Lecturer in Criminal Law and Justice at the University of Manchester.
